DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The Applicant is instructed to elect one Species from Part A, followed by one Species from Part B:

Part A: This application contains claims directed to the following patentably distinct Species of annular closing members:

- Species A1: FIG. 2
- Species A2: FIG. 4, Upper Embodiment
- Species A3: FIG. 4, Lower Embodiment
- Species A4: FIG. 5
- Species A5: FIGS. 6-7
- Species A6: FIG. 8-10

Part B: This application contains claims directed to the following patentably distinct Species of cover plate shape:

- Species B1: Circular
- Species B2: Rectangle
- Species B3: Triangle

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common technical feature in all species is the cover plate. This element cannot be a special

technical feature under PCT Rule 13.2 because the element is shown in the prior art.

US Patent 1,857,853 teaches a cover plate (19) substantially as claimed.

3. Applicant is required, in reply to this action, to elect a single species from each of Part A and Part B to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. During a telephone conversation with Mr. Alan Clement (Applicant's attorney) on November 14, 2008, the Applicant requested a mailed write-up of the Requirement.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
